**On behalf of the Regional Events Working Group and in conjunction with the Chapter of Coloproctology of the Hungarian Surgical Society, we are delighted to announce the next winter ESCP Masterclass is to be held in Budapest, Hungary on 17 November 2017.**

The Organising Committee with the approval of the Executive Committee of the Hungarian Society has selected the following topic for the MasterClass:

### **“Improving quality of surgical management in colorectal cancer”**

With a panel of renowned European experts in the field we aim to offer in a comprehensive manner a full overview of the surgical management of colorectal cancers. Recommendations based on the most recent guidelines will be provided on the various surgical options of both colonic and rectal cancers with the aim to give clues to improve quality of care in surgical management of these cancers.

This dedicated educational programme will address basic and advanced procedures however avoiding too specialized and unproven approaches in order to help colorectal surgeons and allied specialists from various level of expertise in their daily practice.

[A full programme of the masterclass is available here.](#)

Looking forward to welcoming you at our ESCP Winter 2017 meeting.

Very best wishes

### **The Organising Committee:**

*Attila Bursics, Paul Lehur, Emmanuel Tiret, Eloy Espin, Béla Lester, Géza Papp*
