

Surgical Plume -

A hazardous part of the working environment in many operating rooms, also in yours?

Tuesday

28 September 2021

7:00PM CEST

This webinar will be available on-demand

Join this webinar to learn more about the challenges with surgical plume and also how easy you can eliminate the exposure and improve the air quality in the OR. You will also learn about the new guidelines on how to prevent plume exposure for health care professionals.

Meet our three speakers who all have different background and experiences:

- Mr. Steve Veck will take us through the elements in the plume and why it's so important for it to be evacuated
- Mr. Simon Withey will explain his clear view on plume evacuation and why this is common practice for him
- Mrs. Anita Elisabeth Thomsen will share her experience of implementing plume evacuation in theatre

Your certificate of Attendance can be downloaded at the end of the webinar.

Scan the QR code* or visit <https://Lead.me/bcDfHp> to register for the webinar.
